RSIC-1[®] Backer Handles Heavy Loads

LAS VEGAS, NV -- Single and multi-family homes, condominiums, apartments, hotels, schools, public buildings (e.g., libraries, courthouses, police/fire stations) and military barracks all have the need to install heavy items like cabinets, shelves, lockers, whiteboards, chalkboards, grab bars and hand rails. The **RSIC-1[®] Backer** from PAC International is designed to work with the RSIC-1 wall system to enable heavy items to be installed while preserving the wall's high Sound Transmission Class rating.

The **RSIC-1[®] Backer** supports heavy loads when used with wood, steel and concrete building structures. Additional product information, test data and specifications are available on the company's web site at www.pac-intl.com.

PAC International, Inc., is the world leader in *Noise Control Solutions* and is dedicated to delivering innovative engineering solutions, systems and assemblies using RSIC[®] products that result in benefits to developers, builders, design professionals and the environment. RSIC[®] products are UL Classified and consistently achieve superior Sound Transmission Class (STC) and Impact Insulation Class (IIC) ratings in both new construction and renovations while remaining cost effective and environmentally friendly. ***Quiet and Fire Safe. A Combination for Life.***
